

# Release Notes 7.13.0

*Final Release: 29 Nov 2023*

This release contains many feature requests by TIM customers as well as some UI improvements.

Dashboard v2.21 remains the latest version.

Full list of releases and corresponding release notes can be found at <https://tim-doc.atlassian.net/wiki/spaces/DOC/pages/9175298/Release+Notes>

Feel free to contact our support for further questions,

Your Product & Development Team of TIM Solutions

This version only works with Wildfly 29!

For all updates coming from  $\geq 7.10.2$ : we switched to automated database management - no manual database changes needed anymore.

Coming from older Versions: make sure to update your database with the shipped SQL scripts to 7.10.2 before starting your application server with the newest Version.

Database update instructions

For all updates coming from  $\geq 7.10.2$ : we switched to automated database management - no manual database changes needed anymore.

Coming from older Versions: make sure to update your database with the shipped SQL scripts to 7.10.2 before starting your application server with the newest Version.

## Installation Artefacts

Please remove all application artefacts from deployment folder and use only the new versions.

The current Release contains following artefacts:

- ✓ Release Notes
- ✓ TIM BPMN Engine (tim\_v\*.ear)
- ✓ TIM Dashboard (dashboard\_v\*.war)
- ✓ SQL Update Scripts for update to 7.10.2 (\*.sql scripts)

## Hardware Requirements
