This version only works with Wildfly 29!

Updating to WildFly version 29.0.1 is essential to ensure seamless compatibility, maximize the performance and ensure security enhancements delivered by our software.

Database update instructions

For all updates coming from  $\geq 7.10.2$ : we switched to automated database management - no manual database changes needed anymore.

Coming from older Versions: make sure to update your database with the shipped SQL scripts to 7.10.2 before starting your application server with the newest Version.

## **Installation Artefacts**

Please remove all application artefacts from deployment folder and use only the new versions.
